

Peak Install is a specialist signage installation contractor. We don't manufacture and we don't design, so we never compete with the sign companies, brand agencies and shopfitters who engage us. We install your product, to your specification, under your brand – and hand the client straight back to you.

WHY SIGN COMPANIES PARTNER WITH PEAK INSTALL

- **Install-only: zero channel conflict.** No manufacturing or design arm; your client stays your client.
- **Licensed builder and registered electrical contractor in-house.** Permit-dependent, structural and illuminated works don't stall waiting on a third party.
- **WPCG-certified for fuel retail.** Full ticketing and inducted procedures for service station and forecourt environments.
- **One contractor across the whole scope.** Crane-assisted pylons through to window graphics, plus line marking and acoustic panelling fit-outs.
- **We own our plant.** EWP, crane truck, rigid trucks and utes in-house – no hire lead times, no third-party markup, and we can collect from your factory.
- **100% digital paperwork.** SWMS, insurances, photographic sign-off and completion reports emailed the same day we finish, then archived on our Google Drive for the life of the sign, so a record is never more than a phone call away.

INSTALLATION CAPABILITY

- Pylon & sky sign installation (engineered footings, crane-assisted)
- Fascia & shopfront signage
- Illuminated signage – LED and traditional
- Digital signage & LED screen installation
- Wayfinding & statutory signage
- Retail fit-out signage packages
- Automotive showroom programs
- Petrol / service station works (WPCG)
- Vehicle signage & fleet graphics
- Vinyl, window graphics & wall wraps
- Traditional sign writing & custom lettering
- Event signage, banners & temporary displays
- Line marking – car parks and roadways
- Acoustic wall panelling

MAINTENANCE, REPAIRS & AFTERCARE

- Scheduled inspections and condition reporting
- Sign cleaning and presentation programs
- Fault-finding, electrical repairs and re-lamping
- LED conversions and energy-efficiency upgrades
- Panel, face and component replacement
- 24/7 emergency call-out (make-safe and reinstatement)

COVERAGE & ENGAGEMENT

Service area & hours	Metropolitan Melbourne and regional Victoria from Epping; interstate by arrangement. Mon–Fri 6am–6pm, plus night, weekend and pre-open works in trading and forecourt environments.
Plant, fleet & engagement	Company-owned EWP, crane truck, rigid trucks and utes – we handle collection from your factory, delivery to site and the lift, all in-house. Engaged as your subcontractor per project or under an agreed schedule of rates for rollout work.

“We prioritise the well-being of our team members, associates and clients above all else – our commitment to safety and collaboration underwrites every job we take on.”

BEN MORRIS · FOUNDER, PEAK INSTALL

SAFETY & COMPLIANCE

Documentation & inductions	Job-specific SWMS issued before mobilisation, site-specific risk assessment, JSA and daily pre-start records. Site-specific inductions maintained for construction, retail centre and operational-site access.
Working at heights	Height safety systems, harness and anchor-point procedures, exclusion zones and public-protection controls for street-front and trafficable areas.
Plant & equipment	Company-owned EWP and crane truck operated by licensed personnel; crane-assisted lifts with lift studies and dogging/rigging as required, plant pre-start inspections and maintenance records maintained.
Electrical	Energy Safe Victoria accredited electrical works, isolation and test-before-touch procedures, certificates of electrical safety issued on completion.
Fuel retail (WPCG)	Full WPCG tickets and certifications, hot-work and hazardous-area permits, forecourt isolation and site induction compliance.
Building & permits	Registered building practitioner (VBA) capability – planning and building permit coordination, engineered footing design and structural certification.
Traffic & public safety	Traffic management plans, permits for road and footpath occupation, pedestrian diversion and after-hours scheduling in trading environments.

HOW WE WORK

- | | |
|--|--|
| <p>01 Scope assessment
Drawings reviewed and access, plant and structural constraints identified before pricing. Site visits arranged where the scope calls for it.</p> <p>02 Permits & engineering
Planning and building permits, footing design and structural certification coordinated as required.</p> <p>03 Program & documentation
Dates locked, SWMS, insurances, traffic management and inductions issued ahead of mobilisation.</p> | <p>04 Installation
Fully equipped crews and the correct plant on site, works completed to specification and the site left clean.</p> <p>05 Sign-off & handover
Photos, completion report and certificates of electrical safety emailed the same day, and archived on our Drive for the life of the sign.</p> <p>06 Aftercare
Warranty support, scheduled maintenance and 24/7 emergency response as agreed.</p> |
|--|--|

Let's get it installed.

Send us the drawings and site address – we'll come back with a fixed price, a program and the documentation your client needs.
